

Note to readers with disabilities: *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to [508 standards](#) due to the complexity of the information being presented. If you need assistance accessing journal content, please contact ehponline@niehs.nih.gov. Our staff will work with you to assess and meet your accessibility needs within 3 working days.

Supplemental Material

Individual and Joint Effects of Early-Life Ambient PM_{2.5} Exposure and Maternal Pre-Pregnancy Obesity on Childhood Overweight or Obesity

Guangyun Mao, Rebecca Massa Nachman, Qi Sun, Xingyou Zhang, Kirsten Koehler, Zhu Chen, Xiumei Hong, Guoying Wang, Deanna Caruso, Geng Zong, Colleen Pearson, Hongkai Ji, Shyam Biswal, Barry Zuckerman, Marsha Wills-Karp, and Xiaobin Wang

Table of Contents

Table S1. Spearman Correlation Coefficients for Periods of Early-life Exposure

Table S2. Individual effects of mother's pre-pregnancy BMI or ambient PM_{2.5} exposure on the risk of childhood BMI z-score.

Table S3. Individual effects of ambient PM_{2.5} exposure on the risk of childhood overweight/obesity stratified by child's age.

Table S4. Adjusted effects of ambient PM_{2.5} exposure on the risk of COWO by temperature.

Table S5. Individual effects of ambient PM_{2.5} exposure on the risk of COWO (Subjects within 10 km of a Monitor).

Table S6. Individual effects of ambient PM_{2.5} exposure on the risk of childhood overweight/obesity (Subjects within 5 km of a Monitor).

Table S7. The joint effects of maternal BMI and ambient PM_{2.5} on the risk of childhood BMI z-score.

Table S8. The joint effects of maternal pre-pregnancy BMI and PM_{2.5} exposure on the risk of childhood overweight/obesity stratified by child's age.

Table S9. Adjusted joint effects of mother's pre-pregnancy BMI and ambient PM_{2.5} exposure on the risk

of COWO by temperature.

Table S10. The joint effects of maternal BMI and ambient PM_{2.5} exposure on the risk of childhood overweight/obesity (Subjects within 10 km of a Monitor).

Table S11. The joint effects of maternal BMI and ambient PM_{2.5} exposure on the risk of childhood overweight/obesity (Subjects within 5 km of a Monitor).

Figure S1. Flow Chart of Subjects Enrolled in the Boston Birth Cohort Included/Excluded from the Current Analysis

Figure S2. Mean Ambient PM_{2.5} Exposure over Time in a Subset of 1657 participants in the Boston Birth Cohort from 1999-2012
